

The journal publishes original papers, short communications, review articles, short scientific reports and description of new varieties. Papers are published in English (British spelling). The author is fully responsible for the originality of the paper and formal correctness. The paper must not be published previously elsewhere. The Board of Editors decides on the publication of papers, taking into account scientific importance, peer reviews and manuscript originality, quality and length. All contributions are reviewed by at least two referees.

Manuscripts must be submitted in carefully edited English. To save time electronic manuscript submission is preferable. Alternatively, the manuscript can be sent by mail on a properly labelled floppy disk or CD.

Copyright. The journal is protected by copyright held by the publisher after the manuscript has been accepted for publication. As concerns the transfer of rights, the corresponding author takes over responsibility for all authors. No part of this publication may be reproduced, stored, or transmitted in any form or by any means, without the written permission of the publisher.

Manuscript layout. Standard size of paper (A4 format), type size 12 font, double-space lines, 2.5cm margins on each edge of the page. MS Word should be used. Tables, graphs, and other material are to be submitted separately to the text. Word editor should be used to create tables, for tables each item should be placed into a separate cell. Tables are to be numbered with Arabic numerals in the order in which they are referred to in the text and have a brief, but self-explanatory title. Abbreviations or symbols used in the tables must be explained either in the table title or as a footnote. Graphs should be provided in Excel and they should be stored with original data. Autotypes (photos and diagrams) (black and white ones are preferred) should be submitted in TIFF or JPGE format. All photos, graphs, illustrations and diagrams should be referred to as a figure and numbered, continually according to the order in which they are included in the text, using Arabic numerals. Coloured photos or maps can be published in printed version at the authors' cost. However, coloured documents submitted are published free of charge in pdf format of papers available at the journal web page. If any abbreviations are used in a paper, they shall be explained appropriately when they are used in the text for the first time. It is not advisable to use any abbreviations in the paper title or in the abstract. The SI international system of measurement units should be used.

Title page must contain title of paper (short, not exceeding 85 characters; no subtitles should be used), complete name(s) of the author(s), the name(s) and address(es) of the institution(s) where the work was done.

Abstract is a short summary of the whole paper. It should describe all essential facts of a scientific paper. Keywords must be included. The abstract should not go to more than 250 words. The abstract is an important part of the paper because it is published and cited in world databases. **Keywords** (a maximum of 6 in alphabetical order) should differ from words mentioned in the title. No references are to be cited in the abstract.

The main text of scientific paper must be developed under the following headings: Introduction, Material and Methods, Results and Discussion. Results and Discussion can be presented under one heading. Short communication should have an abstract and Material and Methods can be integrated in the text.

Introduction should outline the main reasons why the research was conducted, describe a brief review of literature consisting of refereed periodicals, journals and books, and the goal of the authors. It is recommended to

include references to papers from peer reviewed periodicals only. Citations from non-available sources (reports, books and proceedings not containing abstract and explanations in English) should be omitted.

Material and Methods. All material, experiments conducted, their extent, conditions and course should be described in detail in this section. All original procedures that were used for the processing of experimental material and all analytical methods used for evaluation should also be detailed. Data verifying the quality of acquired data should be indicated for the used methods. The whole methodology is only to be described if it is an original one, in other cases it is sufficient to cite the author of the method and to mention any particular differences. Methods of statistical processing including the software used should also be listed in this section.

Results and Discussion. The results obtained from the experiments including their statistical evaluation and any commentary should be presented graphically or in tables in this section. The author should confront partial results with data published by other authors, whose names and year of publication are to be cited by including them in the text directly, e.g. ... as published by PAYNE (1987), WELSH and MCCLELLAND (2001) found ..., or citing authors and years of publication in parenthesis (PAYNE 1987; WELSH & MCCLELLAND 1990; SPETSOV *et al.* 1997).

Acknowledgments, if any, should follow the text and precede the references.

References should be a list of refereed periodicals arranged in alphabetical order according to the surname of the first authors. The full title of all authors should be followed by the year of publication cited in brackets, the original title of the paper, the full name of the periodical, the relevant volume and page number, in the case of a book or proceedings the title should be followed by the name of the publisher and the place of publication. Literary sources should be cited in the original language. Only papers cited in the text should be included in the list of references.

Examples of references in the list:

PAYNE P.I. (1987): Genetics of wheat storage proteins and the effect of allelic variation on bread making quality. *Annual Review of Plant Physiology*, **38**: 141–153.

WELSH J., MCCLELLAND M. (1990): Fingerprinting genomes using arbitrary PCR primers. *Nucleic Acids Research*, **18**: 7213–7218.

Papers published in monographs or proceedings should be cited like this:

VOJDANI P., MEYBODI M. (1993): Distribution and genetic diversity of primitive bread wheat in Iran. In: DAMANIA A.B. (ed.): *Biodiversity and Wheat Improvement*. John Wiley & Sons, Chichester, 409–415.

Contact address should include the postal address, telephone and fax number, and e-mail of the corresponding author.

Offprints: Corresponding author will receive a free “electronic reprint” in Portable Document Format (pdf) sent via e-mail as an attachment. Free reprints are also available at <http://www.cazv.cz>.

Compliance with these instructions is obligatory for all authors. If a manuscript does not comply exactly with the above requirements, the Editorial Office will not accept it for a consideration and will return it to the authors without reviewing.
