

Editorial Board of Czech Journal of Genetics and Plant Breeding

Editor-in-Chief

Ing. Václav Šíp, CSc., Crop Research Institute, Prague, Czech Republic
Plant breeding methodology, cereal genetics/breeding, disease resistance

Co-Editors

RNDr. Miroslav Griga, CSc., AGRITEC, Ltd., Šumperk-Temenice, Czech Republic
Plant biotechnology, molecular breeding, legumes and industrial crops

RNDr. Erik Schwarzbach, Dr. agr. habil., Miroslav, Czech Republic
Analysis of cultivar trials and trial series, plant breeding methodology, genetics of disease resistance

Executive Editor

Ing. Markéta Knížková, Institute of Agricultural Economics and Information, Prague, Czech Republic

International Editorial Board

Dr. Gérard Branlard, INRA Clermont-Ferrand – Theix, Clermont-Ferrand, France
Genetics and biochemistry of wheat quality, protein markers, proteomics

Ing. Bohumír Cagaš, CSc., OSEVA PRO s.r.o., Zubří, Czech Republic
Plant pathology, plant breeding, plant genetic resources (especially grasses)

Doc. Ing. Vladimír Čurn, Ph.D., University of South Bohemia in České Budějovice, České Budějovice, Czech Republic
Protein and molecular markers, oilseed rape genetics and breeding, alternative crops

Ing. Petr Dědič, Potato Research Institute, Havlíčkův Brod, Czech Republic
Potato genetics and breeding, phytopathology, biological and molecular characterization of viruses

Ing. Ladislav Dotlačil, CSc., Crop Research Institute, Prague, Czech Republic
Genetic diversity analysis, plant genetic resources, agro-biodiversity

Doc. Ing. Antonín Dreiseitl, CSc., Agrotest fyto, Ltd., Kroměříž, Czech Republic
Plant pathology, genetic resources, disease resistance, genetics and breeding

Prof. Ing. Jaroslava Ehrenbergerová, CSc., Mendel University of Agriculture and Forestry in Brno, Brno, Czech Republic
Cereal breeding methodology, food quality and safety of cereals, genotype by environment interaction

Prof. Dr. Gerhard Fischbeck, Technische Universität München, Freising-Weihenstephan, Germany
Plant breeding methods, marker-assisted selection, response to agricultural systems (plant nutrition)

Prof. Dr. Wolfgang Friedt, Institute of Crop Science & Plant Breeding, Giessen, Germany
Oilseed crops genetics and breeding, genetic diversity and inheritance, QTL/linkage mapping, pyramiding resistance genes

Prof. Ing. Jana Hajšlová, CSc., Institute of Chemical Technology, Prague, Czech Republic
Quality of agricultural products, methods of quality determination, food contaminants, analysis of genotypic and environmental effects

Ing. Jiří Hartmann, CSc., Central Institute for Supervising and Testing in Agriculture, Brno, Czech Republic

Quantitative genetics, variety testing, agricultural field trials, trial series, application of biometrical methods

Dr. Ing. Pavel Horčíčka, SELGEN, a.s., Plant Breeding Station Stupice, Czech Republic
Cereal and legume breeding, grain quality, resistance to stresses

Dr. Ahmed Jahoor, University of Copenhagen, Copenhagen, Denmark
Molecular methods, marker assisted selection, genetics of resistance, mapping resistance genes

Doc. RNDr. Ján Kraic, Ph.D., Research Institute of Plant Production, Piešťany, Slovak Republic
Molecular breeding, genomics, biodiversity studies, genetic modifications

Prof. Dr. Ákos Mesterházy, Cereal Research Institute, Szeged, Hungary
Cereal resistance to diseases and pests, plant protection, breeding methods

RNDr. Jaroslava Ovesná, Crop Research Institute, Prague, Czech Republic
Food safety, molecular genetics and breeding, DNA markers, structural/functional genomics

Prof. Dr. Hans-Peter Piepho, University of Hohenheim, Stuttgart, Germany
Biometrical genetics, bioinformatics, marker analysis, series of field trials, genotype-by-environment interaction

Doc. RNDr. Jana Řepková, CSc., Masaryk University, Brno, Czech Republic
Plant genetics, cytogenetics, DNA markers, genetic mapping

Prof. Dr. Peter Ruckebauer, University of Natural Resources and Applied Life Sciences, Vienna, Austria
Breeding agricultural crops, food safety of cereals, stability of quality traits, genotype by environment interaction

Prof. John W. Snape, Department of Crop Genetics, Norwich. United Kingdom
Crop genetics, genomics, mapping, QTL analysis, crop transformation and its applications

Dr. Mike Taylor, Zuchtstation Limagrain-Nickerson, Peine-Rosenthal, Germany
Wheat breeding, quality and disease resistance

Ing. Martin Užík, DrSc., Research Institute of Plant Production, Piešťany, Slovak Republic
Plant breeding methodology, cereal and forage crops breeding, biometrical genetics, analysis of quantitative traits, nitrogen utilization
